PRD: answer writers and reviewers
Pairwise reviews
$v_{1,1}$ $v_{2,1}$ $v_{3,1}$
$v_{1,2}$ $v_{2,2}$ $v_{3,2}$
$v_{1,3}$ $v_{2,3}$ $v_{3,3}$
rows: answer pairs; columns: judges
Current weights
$w_1^{(t)}$
$w_2^{(t)}$
$w_3^{(t)}$
Weighted decisions
Compare anonymous answers
Compute model scores and rankings
PRD: peer-assessed answer scores become the next judge weights.
Proposed: agreement with other families becomes the next judge weights.
Start equal; normalize and repeat.
Reuse the same reviews at each update.
